

IMPORTANT INFORMATION

Failure to follow these instructions will slow the processing of your job.

- 1. Do not modify the document size of this file. Your canvas size should be 450 x 320mm to match this document.
- 2. Do not move the position of the box template
- 3. Create your artwork and extend it out to the bleed area.
- 4. Remove the template layer including the template lines or cover them up entirely. Leaving the template layer on or visible is not required for us to verify everything is correct. Only send what you want printed.
- 5. Save this file as a PDF (with no crop marks).
